Oliver(?), Franklin

December 20, 1927

December 20, 1927.

Dear Mr Noe:

Enclosed are two velox prints of the halftone negative of the coins.

Will you please indicate by either
cutting with shears
or by a pen and ink line
where you want the cuts trimmed -- how much of the shadow in each cut, is to appear.

They have photographed with a very low light so as to cast a good long shadow, and you can cut part of it off.

I think it will be best to silhouette each coin, rather than permit any screen to appear in the background.

As these prints are made from the halftone negative, you may expect to keep all of the detail in the halftones themselves. They have "lost" all they will lose.

Cordially,

Frank Lee Dever
